Convenience

➤ **Electronic Funds Withdrawal (EFW)**

Your clients who e-file and owe tax can enjoy the convenience of paying electronically with EFW. They can authorize an EFW at the same time the e-file return is filed—no more worries about separately mailing a check. Simply enter the banking information for either a checking or savings account and choose the appropriate payment date. And, you can even use EFW to schedule your client's next year's estimated tax payments. Refer to your software for instructions.

➤ **Web Pay**

Web Pay is the fast, safe, and efficient way for your clients to pay their personal income taxes online. Web Pay allows your clients to request that FTB debit their bank account for their payment. With Web Pay, your clients can make the following types of payments online:

- Estimated Tax
- Bill
- Return
- Extension

Web Pay works a lot like an online bill payment transaction. Taxpayers authorize payments from their checking or savings account on a specific date. They even have the option of scheduling the payments up to a year in advance; a great feature for those who make yearly estimated payments.

It's simple. All your clients need to do is this:

1. Go to **ftb.ca.gov** and search for **web pay**.
2. Login using their social security number.
3. Choose their payment type.
4. Select the date they want the payment made.
5. Enter their banking information.
6. Get instant confirmation that their request was received.
